

This message is from the School Nurse:

Reminder for parents, if your child tests positive for COVID-19, or is in quarantine, please provide the school with the documentation as soon as you receive it from the Belmont County Health Department or upon their return to school. The Health Department can be reached at 740-695-1202. They usually communicate instructions for quarantine via email. If they do not contact you, please call them or email them that you or a member of your household has tested positive. Email addresses for contact tracers can be found on the health department website at [belmontcountyhealth.com/staff](http://belmontcountyhealth.com/staff).

This is important for us to maintain the health and safety of our students.
